Gary:

For Lonestar, we provided assistance with the overreach forklift unloading, reloading and relocating materials throughout the day. We operated the man lift for installation of the exhaust vent to the carbon adsorption unit. We plugged the North Drain and provided a plastic cover over it with supports. We relocated the eye wash and Myers pump to provide safety support.

For Republic we provided location of the roll off containers and vacuum boxes. We check all labels, portals, and seals for each load.

Leroy:

I need to know exactly what support we provided to Lonestar and Republic.

All we should have done for Lonestar was to offload some chemicals. They were supposed to take care of everything else.

All we should have done for Republic was to show them where the boxes were located. Everything should have already be closed and tightened on all the boxes.

Thanks

Gary Moore

Gary:

It was a very long and complicated day yesterday. I apologize for the metric delay. Our crew provided support to both the Lonestar operation and Republic Services pick up of waste yesterday. The continued to gather the remaining solids from Group 1 and Group 2 , and completed Group 21. Containers completed 12, Containers cut up 9 Republic Services picked up two VB for solidification and one OT for disposal. Lonestar completed one truck load that was received at their facility.
